CONTACTS TRANSFERRING
ADDITIONAL INFORMATION

After pairing is completed, the contact list transfer to the audio system will begin (if your phone is supported). The downloaded contact list may start with either First or Last Name, depending on the phone make and model.

Some phones may request approval to download your phone contact list to the audio system.
(If approval is not granted, the phone may frequently disconnect or not download contact list.)

This process may take a few minutes depending on the phone make, model and number of entries in the phone contact list.

If your phone prompts permission for the vehicle's audio system to access your contacts and call history, ensure the check box is marked to "Always allow" or "Don't ask again." This will allow the phone to automatically connect to your vehicle and Voice Recognition will have access to your phone contact list.

COMMON VOICE COMMANDS

To start voice command, press the TALK button.

HELP provides guidance on commands that can be used within the current function.

Once the phone has been paired, you can use the following commands:

Say "CALL" to initiate a call followed by saying the saved contact's name you wish to speak to. For example, "CALL JOHN SMITH."

"DIAL" makes a call by dialing the spoken numbers. For example: "DIAL 1-844-340-9741."

"PHONE" provides guidance on phone related commands.

"CALL HISTORY" displays the phone's Call History screen.

"CONTACTS" displays the phone's Contacts screen.

DISCLAIMER: Compatibility and performance may vary based on your phone, the phone's software and your wireless carrier.
